All our products are developed using **carefully sourced raw materials, resulting in pure and clean label products aligned with global quality and regulatory standards.** Our product development process is monitored for optimal customer-centric solutions, with a strong focus on health and sustainability standards.

Bringing ideas to life, every day

- Developing market-focused solutions
- Using AAK Co-Development process, for best results

Offering tailor-made solutions

- Customer-centric solutions, from tailored specifications to flexible packaging
- Providing multi-oil blending and neutral taste with oxidation stability

Making food safety a top priority, always

- Global and regional regulatory compliance
- Internal AAK vendor qualification program (audited and pre-approved suppliers)
- AAK production sites are each certified according to international standards
- Proprietary oil refining and contaminant mitigation processing

Implementing, successfully

- Global supply network from multiple facilities
- Supply chain leadership for simplified planning and reduced storage costs
- Scale-up production development with: benchtop, pilot and commercial batch evaluations

Getting you to market, more efficiently

- Global resources, with regional market expertise
- Customer-centric product launch support
- Proximity to a wide range of markets and consumers, due to global reach and coast-to-coast supply
- Helping you access new markets, by meeting ever-changing consumer needs
- Offering AAK Academy: onsite advanced training in lipid technology for your teams

We bring it all together...

- Clean label/non-GMO
- Organic
- Improved bioavailability
- Sustainability and traceability
- Tailored additives (antioxidants/emulsifiers)
- Improved oxidation stability
- Simplified planning
- Flexible packaging

Sustainability & responsible growth

To ensure a sustainable business footprint, we have developed a model based on the UN Global Compact principles. This allows us to drive progress within our Corporate Social Responsibility (CSR) activities and focus efforts within five key areas. We continuously achieve objectives within each area, thanks to internal and external performance benchmarks, sharing best-practice principles and our highly engaged global organization.
